

MAKE A MOBILE

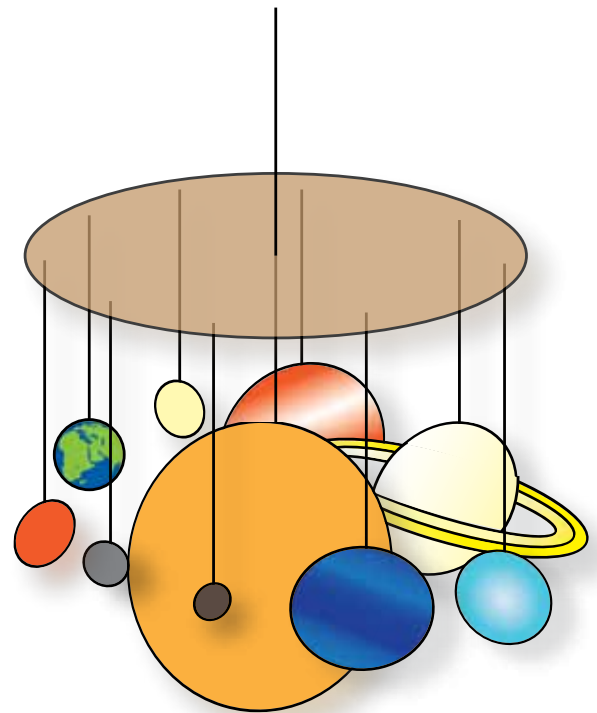

Nancy loves gazing at the twinkling stars in the sky. Do you know what else is fancy in the world up above? Planets! Create a solar system (that's fancy for outer space) mobile with the planets and Pluto revolving around the sun. Then, put your out-of-this-world mobile on display—it will add a touch of star power to any space!

SUGGESTED MATERIALS:

- ★ Cardboard circle (from a frozen pizza box works well!)
- ★ Crayons, markers, colored pencils
- ★ Scissors
- ★ String
- ★ Tape

INSTRUCTIONS:

- ★ Color the cardboard circle, the planets, Pluto, and the sun using the templates provided.
- ★ Ask an adult to help you cut out each of the templates.
- ★ Cut ten 10-inch pieces of string.
- ★ Tape one piece of string to the back of each template.
- ★ Mark ten dots on the cardboard circle: one dot in the middle of the circle marking the sun and nine dots that circle the center dot along the outer edge of the cardboard.
- ★ Ask an adult to use scissors or another sharp tool to poke small holes where each of the dots is marked.
- ★ One by one, take each piece of string and thread them through the holes. Use tape to secure the string to the cardboard.
- ★ Tape another piece of string to the top center of the cardboard circle so that you can hang your cosmic creation.

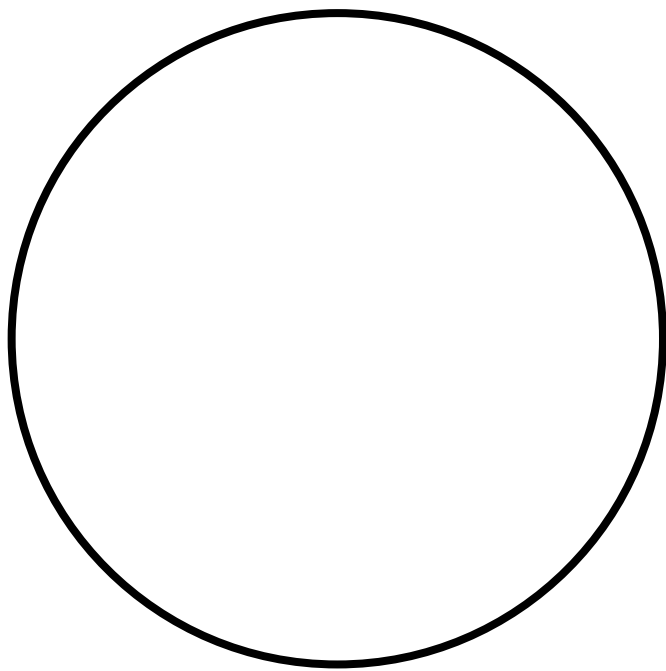

Safety note: When making crafts, it is important to keep safety in mind. Children should always ask permission from an adult before using scissors.
